Elfima Pastel

Elfima presents Elfima Pastel, the solution to create automatically PDF documents. This application allows you to create easily and quickly documents with formatted texts, pictures, bookmarks, links, etc., and to insert the creation process in an all-automatized architecture. Elfima Pastel is easy to integrate. It's the perfect tool to increase the capability of your existing applications, such as ECM, BPM, CRM, or others. With Elfima Pastel you can also easily create PDF documents from web forms, convert text to pdf (txt2pdf), or convert jpeg pictures to pdf (jpg2pdf).

PDF format is a portable format created by Adobe. It's the perfect format to publish documents and to diffuse massively information.
