

# Elfima Notepad FAQ

## How to modify the left position of a text

Insert the following line directly in your text:

```
<set>x=100
```

Where 100 is the new left position value (in points).

You can also increment the left position:

```
<set>x+20
```

## How to modify the top position of a text ?

Insert the following line directly in your text:

```
<set>y=100
```

Where 100 is the new top position value (in points).

You can also increment the top position:

```
<set>y+20
```
