

Elfima Notepad

Elfima Notepad is a free text editor to create and modify PDF, SVG, XHTML, and XML documents. If you want more information about Elfima Notepad please contact us:

<http://www.elfima.com/contact.php>

This document is an Elfima Notepad PDF document sample.

You can use Elfima Notepad as the Windows Notepad, but with some extra features such as export to PDF, XHTML, SVG, and XML formats. You can also open files created with Elfima Notepad.

You can insert pictures, bookmarks, annotations and hyperlinks in PDF documents.

Installation

Please go to <http://www.elfima.com/enotepad.php> to download installation setup

<http://www.elfima.com/enotepad.php>

Then execute setup file setup-enp-full.exe and follow the instructions.

If you have trouble during this installation go to the Elfima Support webpage:

<http://www.elfima.com/support.php>

Utilisation

To create a PDF document

1. In the file menu, click Export then PDF
2. Select the file name to create (Note : a PDF extension will be automatically add to this name).

How to format a PDF document

To format your PDF documents the "Enable line formatting" option must be selected.

This option can be selected with the menu Format/PDF

Then you will be able to modify the format for a line with a simple tag at the beginning of the line.

This Elfima Notepad version uses the following tags:

<h1>

<h2>

<h3>

<pb>

Tag <pb> insert a page break.

You can also change dynamically the format.

To change left margin

```
<set>x=50  
<set>x+20  
<set>x-20
```

To change vertical position

```
<set>y=100  
<set>y+20  
<set>y-20
```

To change the space between two lines

```
<set>dy=12  
<set>dy+2  
<set>dy-2
```

To change the font name

```
<set>fontname=Arial
```

To change the font size

```
<set>fontsize=12  
<set>fontsize+2  
<set>fontsize-2
```

To change the maximum of characters for one line

```
<set>maxcar=80  
<set>maxcar+20  
<set>maxcar-20
```

To change the font color

```
<set>fontcolor=128 128 128
```

The color is RGB type, and the three numbers (between 0 et 255) must be separate by a space.

Change dynamically document properties

Insert this lines directly in the text:

```
<set>title=Document Title  
<set>subject=Document Subject
```

<set>author=Document Author
<set>keywords=Document Keywords

To insert an image in a PDF document:

The picture must be a jpg file.
